**OUR VISION:
HEALTH AND FAST HEALING
FOR ALL PEOPLE**

Health and fast healing for everyone – with this visionary goal, Siegfried Breitenbach founded his company as a physiotherapist. Assistance in keeping people healthy as well as “natural” support in the different performance, regeneration and healing phases of the body are central concerns for **K-Active®**. Our guiding principle was developed from this: **“Holistic Solutions for Sport and Medicine”**.

Our goal is to see people holistically with all their structures, emotions, energies, but also in their psychosocial environment. In addition, it is becoming increasingly important for a healthy lifestyle to deal with topics such as exercise, nutrition, drinking behavior, geomancy and electro smog. Only when all influences are taken into account can a person live healthy and happy.

Our product range is based on this philosophy. In this catalog you will of course find our popular and proven **K-Active®** kinesiological tapes, but also products and devices for medicine, therapy and sport. Furthermore, our new product line **K-Active® Green** was added to the catalog. In addition to the practical tools, we also provide you with extensive know-how, be it reading material or one of our popular training courses.

With **K-Active®** you are well equipped all round: in your practice or clinic, in your club or at home!

Have fun browsing

Siegfried Breitenbach

Managing Director of K-Active® and license holder of physiotherapy for the German Olympic Sports Confederation, 20 years of sports physiotherapist for the German Triathlon Union, Member of the German Olympic team in Sydney and Athens

THE K-ACTIVE® STORY

The pioneers in kinesiological taping

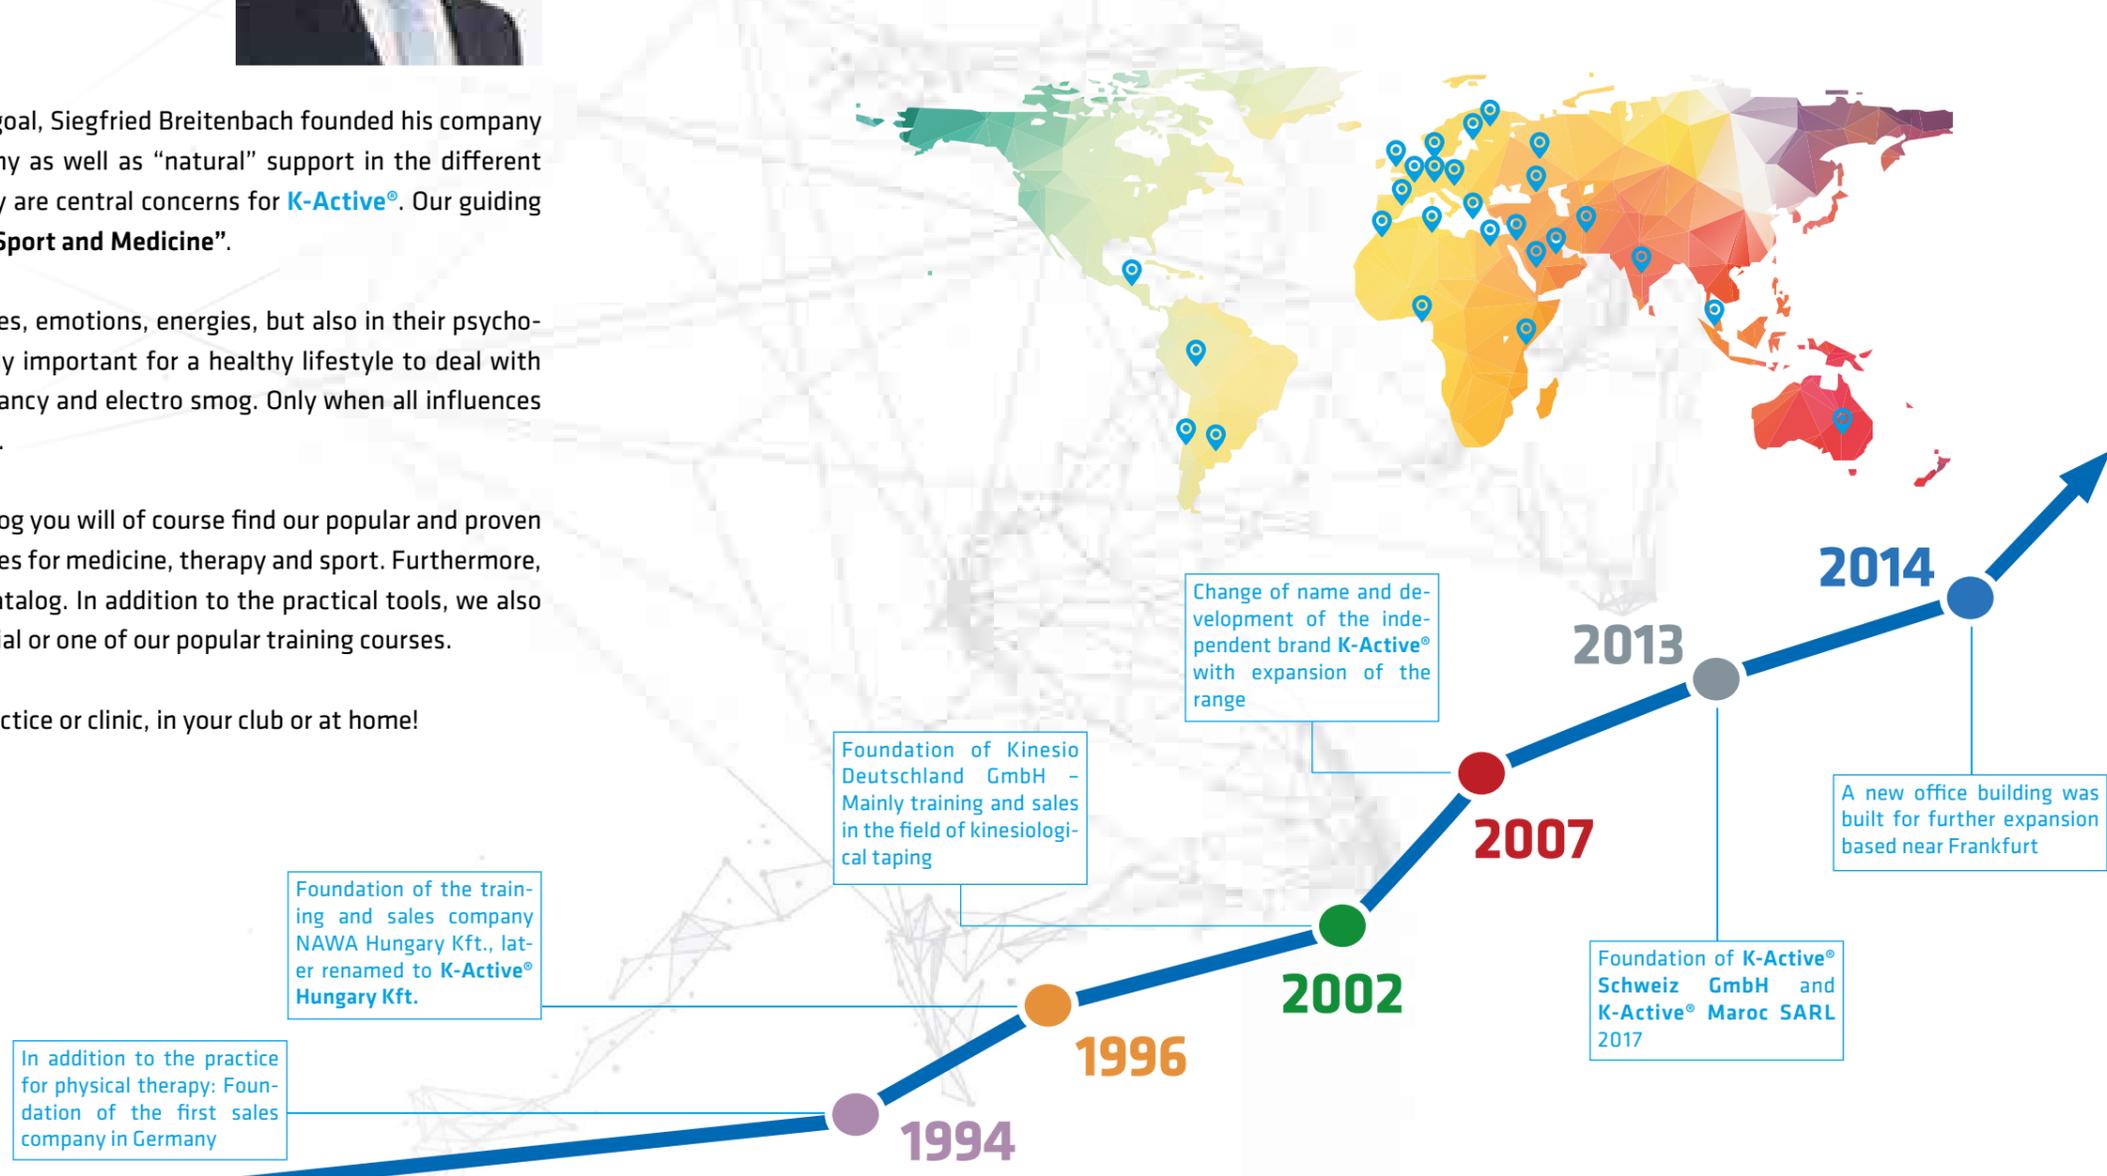

K-Active® Europe GmbH developed from the company **Kinesio Deutschland GmbH**, which was founded in 2002. Since 2007 it has been the exclusive sales partner of the medical device manufacturer **Nitto Denko Corp.** (Japan), which developed the first kinesiological tape, under its own brand.

The sales area includes Europe as well as Russia, Belarus, Ukraine, the Middle East, Africa and South America. In addition, the **K-Active® Group** is a

worldwide training and sales partner for associations, sports teams and well-known medical device manufacturers.

Mission: Making the world healthier together

The success story of **K-Active®** was only possible with strong and motivated partners from over 50 countries in the areas of training and sales. Trusting cooperation and mutual support have made the **K-Active®** brand and products known worldwide. Intensive work is being carried out on the further development of **K-Active®** and its partners.

“IF YOU GIVE EVERYTHING, ...

... you can't blame yourself”

Dirk Nowitzki

Sport has a permanent and, above all, important place in everyday life in many people's lives. We know how important it is to work out when jogging early in the morning, to fight for every point with your team on the field or to consistently exceed your own personal best.

It is therefore our goal to always be on hand to provide support to athletes, trainers and medical staff with both know-how and the necessary tools.

In addition to supporting Olympic teams, numerous national teams, top international teams and

individual athletes, we are also committed to promoting amateur and health sports.

Many top teams from top German sport, such as SV Werder Bremen, SV Darmstadt 98, Rhein-Neckar Löwen or Telekom Baskets Bonn, already rely on and trust in the full-range provider **K-Active®**. Because the product range offers so much more than just the kinesiological tapes recommended by the German Olympic Sports Confederation: Sports tapes and bandages from well-known brands such as **BSN®** and **Urigo®** are just as much a part of the assortment as training equipment and recovery boots. The use of high-quality products enables clubs to do sport at the highest level and with the lowest possible frequency of injuries.

As one of the major professional sports medicine partners in Germany, we look forward to working with you and your team!

We live
#partnership 

Our sports partners (extract):

K-Active® tapes are valued by top athletes and recommended by the DÖSB!

Many Olympic teams, national teams and individual athletes have been using the **K-Active®** products successfully for many years. Doctors and therapists swear by the high quality of the **K-Active®** tapes, since top-class sport is all about strong performance.

K-ACTIVE® TAPES & ACCESSORIES

Faster. Further. Better.

K-ACTIVE® TAPES

Tradition and Innovation – Highest quality for your therapy by decades of experience

A lot has happened since the Japanese company **Nitto Denko** developed the first kinesiological tape over 30 years ago: The original has not only established itself worldwide in modern medicine and top-class sport, it has also continuously evolved and now offers so many therapeutic options like hardly any other tape.

Production takes place according to the highest standards and is continuously monitored. Only a permanently high quality of the tapes guarantees

a carefree use on the patient - no matter whether in the hospital and the therapy practice, in amateur and competitive sports or at home.

Safety

Almost 30,000 employees at **Nitto Denko** dedicate themselves every day to high-quality production and the continuous further development of their products. The individual work steps are ISO-certified by the German TÜV in Japan and guarantee the highest possible level of safety.

Water-repellent cotton fabric

Ice Hockey Team, HSG Wetzlar,
Kickers Offenbach*

Our
Bestseller!

K-ACTIVE® TAPE GENTLE

The perfect and innovative solution for sensitive skin!

Many people have had sensitive skin since birth. For some, however, the sensitivity develops in the course of life, for example due to illness or environmental pollution. Applying a bandage or tape is then often impossible.

The manufacturer Nitto Denko has made this problem its task and developed a completely new technology: the STRATAGEL® adhesive. It is hypoallergenic, splits into itself when it is removed and thus reduces skin irritation to a minimum.

The K-Active® Tape Gentle can also be used to tape sensitive skin, for example in children and the elderly, lymph, cancer and diabetes patients, or in the case of chronic wounds. Nothing stands in the way for supported pain reduction and movement optimization by a kinesiological tape application!

The skin-sensitive!

With the K-Active® Tape Gentle I can finally tape my patients with sensitive skin, because the tape application does not cause any skin irritation thanks to its gentle adhesive.

Dr. Ulrike Aussem, doctor and osteopath

The first tape especially developed for sensitive skin

Gentle, even when removing the tape. This is made possible by the innovative STRATAGEL® adhesive technology, which splits into itself and thus reduces skin irritation to a minimum. The dermatologically compatible quality of the K-Active® Tape Gentle has been confirmed in numerous test series.

Regular kinesiological tapes often pull off a lot of skin particles and can therefore cause skin irritation.

The STRATAGEL® adhesive of the K-Active® Tape Gentle splits up when it is removed; hardly any skin particles are removed and the skin is protected as much as possible.

Thanks to its skin-friendly adhesive, the K-Active® Tape Gentle is perfect for beauty taping in the face area and all over the body.

K-ACTIVE® TAPE GENTLE

Do without a tape application because of sensitive skin? With the K-Active® Tape Gentle, these times are a thing of the past!

- the first tape especially for sensitive skin, latex-free
- reduces skin irritation (even when removing the tape) to a minimum
- especially suitable for allergy sufferers, babies, children and the elderly, lymph and cancer patients and for post-operative and chronic wounds

Box of 1; 50 mm x 5 m
Box of 6; 50 mm x 5 m

Item No.

6829

The 2-in-1 tape!

“ Sometimes I have to change the tape application every day. In such situations I like to use the K-Active® Tape Elite, as it keeps skin irritation as low as possible!

Maik Liesbrock
Physiotherapist VfL Bochum

K-ACTIVE® TAPE ELITE

Extremely long-lasting & particularly gentle on the skin thanks to STRATAGEL® PLUS adhesive technology

Who says strong and gentle are mutually exclusive? At K-Active®, the combination of the two becomes the smartest tape that has ever existed: the K-Active® Tape Elite. By optimizing the STRATAGEL® adhesive technology, in addition to

the proven skin compatibility, the adhesive effect of this product could be increased and therefore the average application time improved.

Universally applicable

Especially, athletes and patients with sensitive skin will be surprised by the K-Active® Tape Elite: The exceptional talent among the tapes is gentle on the skin and yet outstanding in influencing body structures and processes and on the therapeutic results as well.

K-ACTIVE® TAPE ELITE

STRATAGEL® Plus adhesive technology – the exceptional talent for the highest demands. Kind to the skin like the Gentle, long-lasting like the Classic.

- best adhesion and long application time with simultaneous gentle application, latex-free
- adhesive splits up: gentle tape removal without additional skin irritation
- reliability, even under extreme challenges, such as swimming in salt water or sweating profusely

Box of 1; 5,0 cm x 5 m
Box of 6; 5,0 cm x 5 m

The All-Rounder!

Especially with the high loads of stress on the court, the K-Active® Tape Sport with its reduced elasticity is irreplaceable for my professional basketball players and me!

Ronny Frank, Physiotherapist s.Oliver Würzburg

K-ACTIVE® TAPE SPORT

The price highlight among the K-Active® Tapes

The K-Active® Tape Sport combines all the positive characteristics of the K-Active® Tapes with an unusually attractive price.

In addition to all the tried and tested kinesiological tape applications, the Tape Sport offers even more options thanks to its lower elasticity (140% instead of the usual 155%): The changed tape characteristics support stability and coordination in a sensory way; the tape is therefore particularly suitable for the "mechanical correction" technique.

K-ACTIVE® TAPE SPORT

The all-rounder with its unbeatable price offers many therapeutic options:

- suitable for all kinesiological tape applications
- cost-effective, even for short-term applications
- applications for increased sensory stimuli and more stability due to the lower stretch possible

Box of 1; 50 mm x 5 m
Box of 6; 50 mm x 5 m

6292

Size XL (44 x 52 mm), 40 pieces.

6294

K-ACTIVE® SCISSORS CLASSIC

These scissors are designed to make a sharp cut to prevent the tape from fraying and from prematurely peeling off the skin.

The manufacturer in Solingen is known for its high-quality stainless steel products. This guarantees a high quality standard – „Made in Germany“ – at a fair price.

- Dura-Steel = durable and rust-free
- Solid-Cut = stable and reliable
- Ergo-Grip = ergonomic and light weight

Item No.

Length 21 cm

6283

K-SCISSORS K210

These two Japanese taping scissors have cut surfaces coated with Teflon. This coating prevents the acrylic adhesive from penetrating into the metal pores of the cutting edges. If handled properly, the scissors will retain their sharpness for years.

- scissors made of very light material
- cut surfaces very sharp and durable
- teflon coating

K-SCISSORS K160n

REMINGTON RAZOR PIVOTEER

The free-moving shaving head unit adapts perfectly to the contours of the body. Its advanced, surgical steel blade ensures optimal cutting performance. The washable shaving head enables constant hygienic use.

- ergonomic design
- mains / battery operation with charging station
- three combs for different hair cutting lengths

Item No.

219 mm x 128 mm x 84 mm

6308

SPORT TAPE CUTTER ZIP-CUT

Put an end to the complicated handling of scissors: with the tape cutter ZIP-CUT (sports) taping can be removed quickly and effectively, especially in the area of the ankle. Due to its low weight and compact size, the cutter fits comfortably in the hand and cuts through the tape effortlessly.

- unbreakable nylon
- exchangeable blade

HEALTHPRODUCTS

For your performance.
Regeneration and wound healing.

HEALTHPRODUCTS

Sprays, ointments and creams for well-being, prophylaxis, regeneration, performance enhancement and fast healing

In this category you will find selected health products, with which you can keep fit and feel good. They can also improve your performance and recovery both during sports as well as at work. We also present two special helpers for the special time during and after pregnancy.

Benefits of the health products in the K-Active® shop

- well-known manufacturers
- selected, effective products
- used and proven in the daily work of doctors and therapists
- highest quality and safety for practices, hospitals, sports teams and the private use and application

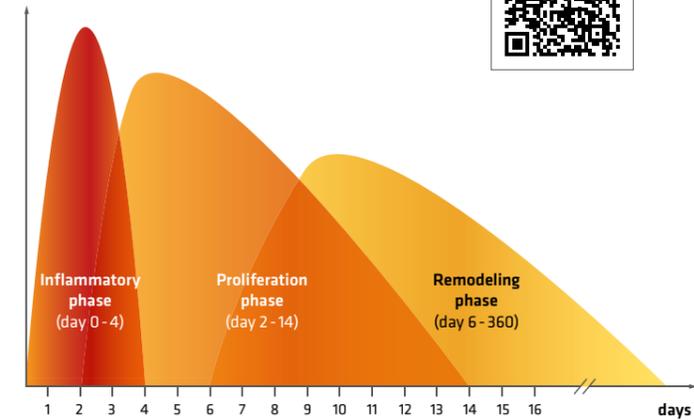

K-ACTIVE® VITALITY LINE

Activated trace elements and minerals ...

... are essential substances for our body that must be regularly supplied through food. They are required for building and maintaining structures, but also as central atoms for enzymes and thus support a large number of metabolic processes in the body.

Daily rhythm

Our vegetative nervous system needs more trace elements during the Sympathikus (**First Aid-, Elektrolyt Creme**), while the Parasympathikus needs more minerals (**Relax Creme**). It is therefore advisable to supply the body with exactly the substances it needs.

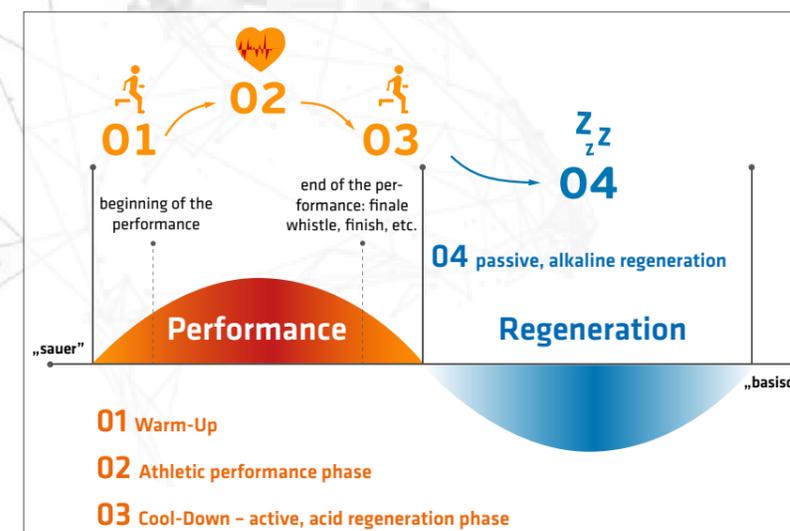

Performance and regeneration cycle

Depending on the body's needs, it can be supported with activated trace elements (**First Aid Creme und Spray**) during the warm-up phase, in the performance phase and during acid regeneration, and during alkaline regeneration with the required minerals (**Relax Creme**).

Wound healing

If the body has to "heal" a wound, it concentrates its activities primarily on this in order to close it again quickly. Studies by the manufacturer show that wound healing can usually be reduced from eight to four days by adding a suitable mixture of trace elements and the right pH value. The **First Aid Spray** is ideal for this and is therefore used on open wounds. The **First Aid Cream** can also be applied around the wound.

From the fifth day after the injury, the administration of trace elements and minerals is adjusted to the daily rhythm again.

K-ACTIVE® FIRST AID SPRAY

Activated trace elements to increase performance, acute care for injuries, operations and burns. Can also be used in the area of mucous membranes. **The effect has been proven in numerous studies.**

- cleans the wound
- reduces bleeding
- prevents infections
- reduces swelling and promotes healing
- without skin-irritating substances

Item No.

200 ml

11020

The 20 ml tubes are ideal for on the go and when traveling

K-ACTIVE® FIRST AID CREME

Used in prophylaxis, performance enhancement, in "active, acidic regeneration" as well as in closed injuries and operations.

- can be used in prophylaxis before and during sport (incl. Cool-Down) or according to the daily cycle in the morning (Sympathikus)
- can also be used on the mouth, eyes and mucous membrane area
- minimizes the occurrence of hematomas
- promotes healing, reduces swelling and alleviates pain
- suitable for children and sensitive skin
- is applied under the anode during iontophoresis

Item No.

150 ml
20 ml

11010
11010SA

K-ACTIVE® ELEKTROLYT CREME

The **Elektrolyt Creme** differs from the **First Aid Creme** in that it has a higher pH value of the basic substance and an optimized fat content for a noticeably intensive skincare experience.

This medical product is suitable for external use for the healing of injuries to the skin (e.g., cuts, abrasions, tears and bruises), 1st and 2nd degree burns (also sunburn) and for the treatment of scar tissue and blunt trauma (2nd healing phase).

Bruises and edema are reduced more quickly, the swelling is reduced and the pain is relieved. The formation of new tissue is supported, healing after operations or injuries (wounds, burns, sunburn) is improved and scar formation is optimized.

- can also be used on the mouth, eyes and mucous membrane area
- very well applicable for the treatment of radiation damage and older scars
- improves the "energy transport" in the scar area

Item No.

100 ml
20 ml

11040
11040SA

K-ACTIVE® RELAX CREME

Activated minerals. Use in prophylaxis, performance enhancement and "passive, alkaline regeneration". Prevents muscle tension, injuries and cramps.

- supports the "passive" regeneration phase after sport / physical exertion
- counteracts sore muscles and cramps
- supports the structural healing after injuries and operations
- improves the "energy transport" in the scar area
- is applied under the cathode during iontophoresis

Item No.

150 ml

I have been using the Vitality Line successfully for a long time in the field of sports physiotherapy and wound management, and now even effectively in the veterinary field.

Christian Samp, physiotherapist, chief physiotherapist of the Tanzsportverband NRW

POLAR FROST®

Polar Frost® is a pain relieving, natural cooling gel based on aloe vera. It is non-greasy, does not stain and consists of natural ingredients.

Polar Frost® gently reduces the skin temperature of the affected area by 5 to 6° C for approx. 2 to 4 hours after application, without hypothermia or frostbite.

- with natural ingredients (cooling with menthol, care with aloe vera)
- for muscle tension and joint pain
- reduces swelling and inflammation
- used to support painful and inflammatory conditions of the musculoskeletal system (sciatica, back and neck pain)
- also, ideal to refresh and relax after physical exertion

Item No.

Tube; 150 ml	51410
Roll-on; 75 ml	51411
Dispenser; 500 ml	51412
Spray; 220 ml	51420

POLAR HEAT®

The **Polar Heat®** heat gel is ideal for the treatment of non-inflamed muscles and joint pain. It relieves muscle tension and stress.

The **Polar Heat®** heat gel causes increased blood circulation to the applied skin area, which relaxes the muscles and can have a positive effect on pulling pain.

- The effect is based on camphor and capsaicin.
- The application stimulates the blood circulation and makes the region warm and relaxed.
- The increased blood circulation reduces the risk of muscle strains.
- It relieves muscle tension.
- The increased capillary blood flow brings more oxygen into tissue and cells and thus contributes to the healing process.
- An excellent means for top athletes and sports enthusiasts to prevent strains and muscle fiber tears and to increase performance.

Probably not a day goes by without a **Leukotape** or **Gazofix** in use.

Sascha Pander, therapist of the Rhein-Neckar Löwen

SPORT TAPES

For your optimal sports physiotherapy

Different athletes and their therapists also have different requirements for a functional bandage. In order to do justice to everyone, we offer you sports tapes with different quality and price levels. From inexpensive standard tape from **Polysport** to the premium branded product **Leukotape®** from **BSN®**, everything is included.

REHAB MEDIC® SPORTTAPE STRAP ALL

Inelastic, inexpensive "US tape" with thinner cotton fabric and high adhesive strength. Often used in American football and basketball.

- 100% cotton fabric
- hypoallergenic
- easy to tear, both vertically and horizontally
- latex-free

The Rehab Medic Strap All is my favorite because, with its strong adhesive, it still is tight even after a long, sweaty training session.

SPORT & FITNESS

Join the winning team!

TRAINING & REGENERATION

Professional equipment for your success

The right training equipment as well as the right tools for regeneration and therapy are essential in amateur and top-class sport, because they often decide on performance or injury or on victory or defeat.

K-Active® is constantly looking for the right products worldwide for your successful training, winning competitions and optimal therapy.

ACTIV5

The isometric full-body training device improves your muscle strength and coordination and animates you to exercise in just 5-minute training units. The **activ5** teaches children physical activity in a playful way. Simply connect to your smartphone or tablet and access over 100 workouts and exciting games!

- training and play equipment in one
- individual training programs for every fitness level
- active fun for the whole family
- including smartphone stand

Item No.

9.5 cm x 8.3 cm x 3.2 cm

11106

More than 100 workouts controllable via apps

Play and train at the same time

Full body exercises for every fitness level

Measures over 90 kg muscle strength

Standard AAA batteries, 6-12 months life

SMARTSHIRT KIT

With the high-end textile shirt, you can control up to 12 different contact points for all relevant muscle groups in the upper body during NMES training or for regeneration.

- integrated carbon contact surfaces made of Nano-Tubes (= electrodes)
- heart rate measurement through integrated sensor also possible in other sports than EMS
- incl. shirt, heart rate sensor, 2 stims, charging dock for a total of 12 stims, laundry net, spray bottle, mains adapter, sports bag

Item No.

19001

SMARTTIGHT KIT

Eight different muscle groups can be controlled with the **Smarttight**, each two of them parallel in the sense of a combined muscle training.

- training and regeneration programs for muscle groups in the hips, buttocks and legs
- can be expanded to a maximum of eight Smartstims for regeneration
- incl. tight, 2 stims, charging dock for a total of 12 stims, laundry net, spray bottle, mains adapter, sports bag

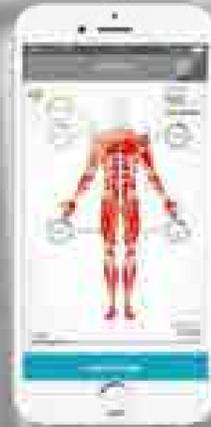

Item No.

19000

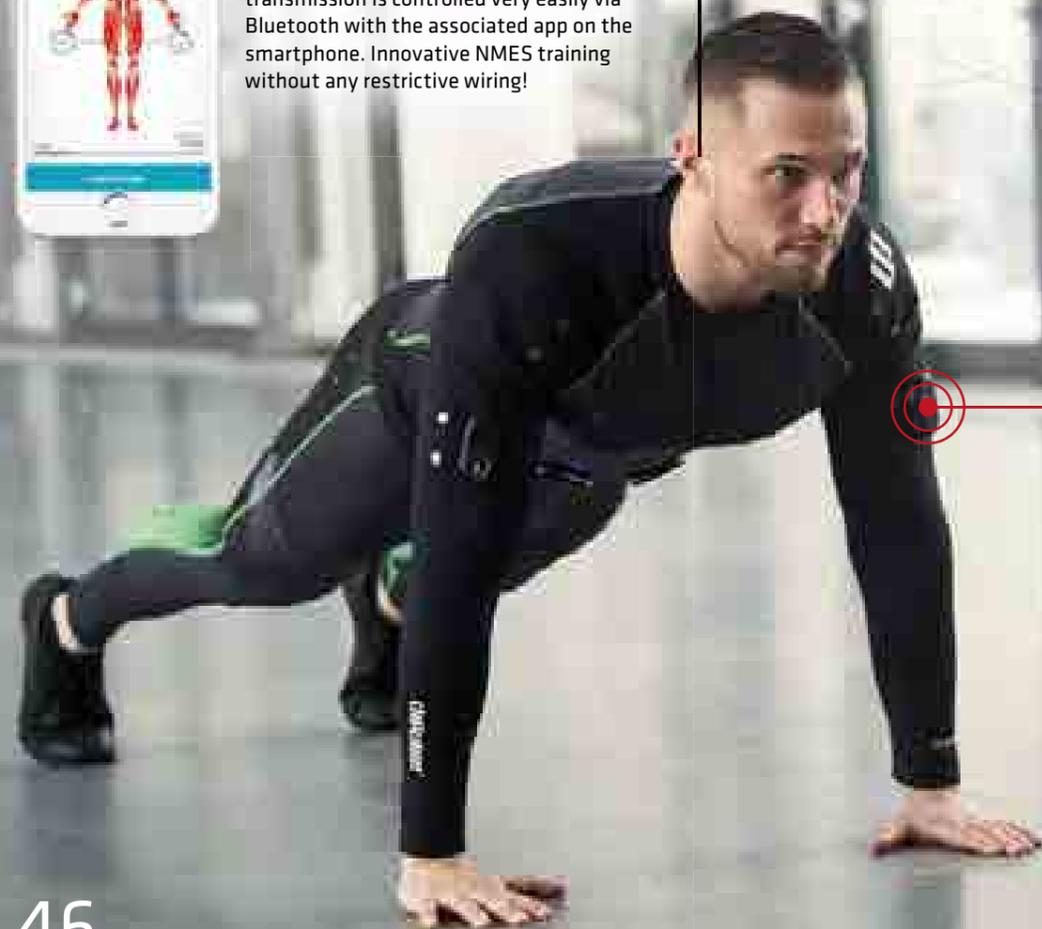

diPulse

SMARTWEAR

Neuro-muscular electrostimulation – now even easier with diPulse Smartwear

The washable functional wear with stims and integrated nanotubes from **diPulse** transmits the impulses for training with electrical muscle stimulation. The impulse transmission is controlled very easily via Bluetooth with the associated app on the smartphone. Innovative NMES training without any restrictive wiring!

SMARTRECOVERY KIT

The lumbar and abdominal belt, two cuffs and electrodes enable optimal NMES training for the entire body.

- almost all muscle groups can be optimally trained or regenerated
- perfect for targeted use in clinics, practices, sports clubs or for self-therapy
- incl. core belt, 2 cuffs, 2 stims, 2 extensions, strap universal extension, plug-in device, adapter, 4 large & 8 small adhesive electrodes, Contact spray

Item No.

19005

SMARTKNEE KIT

The **Smartknee Kit** is suitable for self-treatment or as part of therapy after injuries, operations, pain or other problems in the knee.

- reduces the atrophy of the quadriceps muscle after injuries, operations or osteoarthritis
- with an additional stim, also suitable for regeneration and TENS applications
- trains the quadriceps muscle again
- incl. bandage, 1 stim, charging cable, Contact spray

Item No.

19002

LIMIT DOES NOT EXIST!

FIELDPOWER

FREEDOM OF POWER

FIELDPOWER MULTI MOBILE

The individual areas of the body are stimulated particularly well due to effective training against resistance and the associated alternation between eccentric and concentric muscle tension.

Hyper gravity training does not allow maximum forces to act on the body and is therefore a safe and easy way of resistance training in sports. The flexible tower offers the possibility to move in all directions. If necessary, the tower can also be fixed to a pole or wall. With a maximum distance of 11 meters and a resistance of 48kg, the tower is suitable for use in therapy rooms as well as outdoors.

- trains several areas of the body simultaneously in the movement chain
- promotes muscle building, flexibility, coordination and functional fitness
- inter alia for HIIT and martial arts
- can be rotated 360°
- easy to transport thanks to integrated wheels
- incl. leg and arm loops, vest with eyelets, hip belt and 360° belt

Item No.

50382

GIBBON® SLACKLINE CLASSIC LINE

Training with Gibbon® Slackline has a joint stabilizing effect like no other medium by absorbing impulses and generating a resonance frequency. In addition, coordination is extensively promoted.

- 12.5 m slackline with sewn in loop, 2.5 m ratchet strap
- ergonomically shaped handle
- double sprocket on each side
- ratchet with safety reverse

You can find more Slackline products at www.k-active.com

Item No.

15 m

35501

MUSCLE BELT RF BARCELONA

Training with the Muscle Belt ensures a balanced and optimal development of all muscles when training in a closed system in a movement chain. For the prevention of injuries and of biarticular muscles. Proven effectiveness in the treatment of orthopedic dysfunction and chronic disease.

- increased muscle tension and elasticity
- to prevent injuries
- easy fixation of the belt
- is used in professional and amateur sports, outdoors or indoors

Item No.

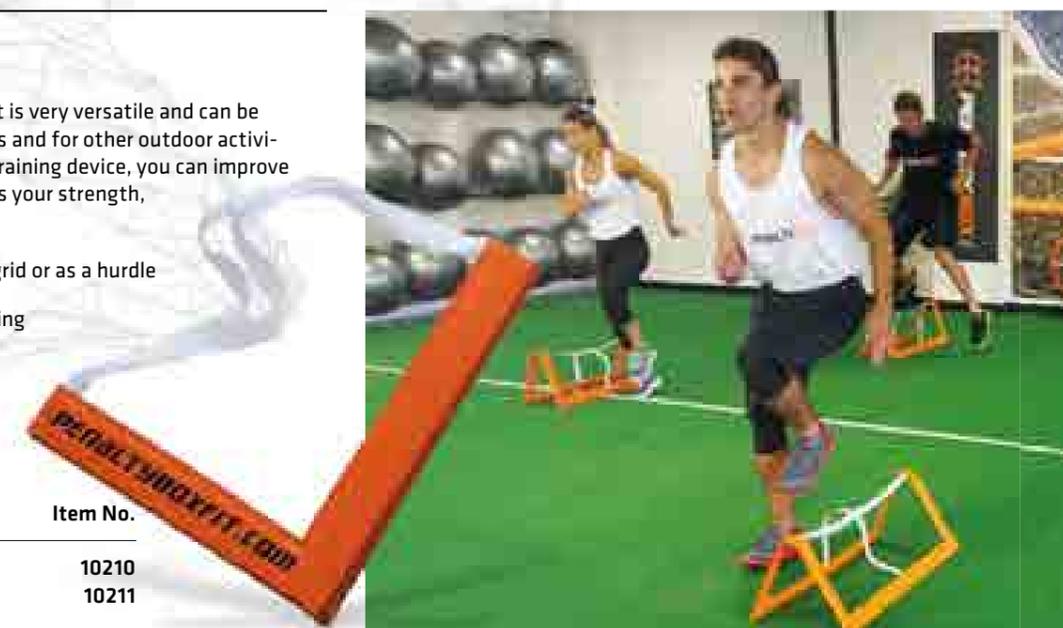

50100

PENALTY BOX

The patented fitness product is very versatile and can be used in many different sports and for other outdoor activities. With this professional training device, you can improve your reaction speed as well as your strength, balance and footwork.

- can be used as an agility grid or as a hurdle
- collapsible and space-saving

AIREX®

High-quality fitness-, gymnastic mats and balance pads

As the world market leader, AIREX® bears a great responsibility, because fitness, holistic training methods and rehabilitation require first-class quality.

This is expressed in the total of the product advantages: many years of experience, paired with Swiss premium quality, flow into the constant further development of the product lines.

AIREX® MAT CORONA 185 / 200

The **professional mat** for physiotherapists and personal trainers is characterized by its great cushioning properties, its size and, above all, its long service life. It is the ideal base for all therapy applications and forms of training.

- meets all requirements of the Medical Directive CE93/42/EWG
- integrated Sanitized® protection
- suitable for outdoor use

185 cm x 100 cm x 15 mm
200 cm x 100 cm x 15 mm

Item No.

31762
31764

AIREX® MAT CORONELLA 185

The Coronella gymnastic mat is the **all-rounder** among the AIREX® mats. Size, skin-friendly material, efficient hygienic protection, anti-slip and sure-footed security and their almost infinite service life are ideally combined.

- optimal damping behavior
- integrated Sanitized® protection
- suitable for outdoor use
- optimal price-performance ratio

185 cm x 60 cm x 15 mm

Item No.

31750

AIREX® MAT FITLINE 140

The classic **entry-level model** for training at home. It saves space, but offers enough space for your head and trunk. Fitness studios with well-booked group fitness courses like to equip themselves with it.

- extremely light and very handy, fits in every sports bag
- integrated Sanitized® protection
- suitable for outdoor use

140 cm x 60 cm x 10 mm

Item No.

31783

AIREX® MAT FITLINE 180

The classic **entry-level model** for training at home. At 1 cm, **Fitline 180** is slightly thinner than the comfortable Coronella or Corona, but 40 cm longer than Fitline 140.

- integrated Sanitized® protection
- suitable for outdoor use

180 cm x 60 cm x 10 mm

Item No.

31785

AIREX® BALANCE PADS

The special waffle structure on the top and bottom offers slip resistance and at the same time pleasantly stimulates the foot receptors during barefoot balance training.

Mini, 41 cm x 25 cm x 6 cm
Elite, 41 cm x 50 cm x 6 cm
Xlarge, 41 cm x 98 cm x 6 cm

Item No.

1330
1312
1320

AIREX® MAT PILATES 190

The thinnest mat in the assortment, yet soft and supportive at the same time, which prevents overstraining of ankles and wrists. In addition, it is firmer to provide better support during demanding Pilates exercises.

190 cm x 60 cm x 8 mm

Item No.

31800

AIREX® BALANCE-BEAM

It is modeled on the shape of a balance beam and is mainly used in physiotherapy to regain walking and foot functions.

- specially developed for balance and proprioception exercises

160 cm x 24 cm x 6 cm

Item No.

1340

BLACKROLL® STANDARD

BLACKROLL® offers people of all ages and sport levels the opportunity to improve their flexibility, balance, mobility and strength through simple exercises and intensive self-massages of muscles and fascia.

- average hardness
- proven massage effect
- ideal for getting started
- incl. exercise card and DVD

Item No.

30 cm x 15 cm Ø

10250

BLACKROLL®**BLACKROLL® MED**

The **BLACKROLL® MED** is the regeneration tool for self-massage and to relieve myofascial tension for beginners, therapy, yoga & Pilates and is 20 % softer than the **BLACKROLL® STANDARD**.

- 20 % softer than the standard roll
- gentle use in the therapeutic area
- for a softer massage
- incl. exercise card and DVD

Item No.

30 cm x 15 cm Ø

10253

**BLACKROLL® MINI**

The **BLACKROLL® MINI** expands its application possibilities with a whole series of new applications – above all the targeted self-massage of smaller areas and muscle groups. In addition to larger rolling movements, you can also only apply pressure at certain points or stretch selectively – for example with rotary movements to stretch the neck.

- practical for on the go, small and light
- for targeted massage of the feet, legs, arms and other areas of the body

Item No.

15 cm x 5.3 cm Ø

10269

**BLACKROLL® BALL**

Optimal possibilities for selective self-massage on different areas of the body.

- ideal for targeting individual back muscles, trigger points and areas
- also suitable for massaging the arms, neck or feet

Item No.

8 cm Ø
12 cm Ø10265
10266**BLACKROLL® DUOBALL**

Regenerative tool for self-massage – this primarily relieves adhesions and tension.

- selective application, e.g., at trigger points
- massage of deeper muscle groups
- due to the distance between the two balls, it is perfect for use in the spine area

Item No.

8 cm Ø
12 cm Ø10267
10268**BLACKROLL® RECOVERY PILLOW**

Whether on the back, on the stomach or on the side: thanks to the two differently shaped pillow sides and the height differences, the pillow is suitable for every sleep type and you can vary your lying position on the **RECOVERY PILLOW** as you wish.

- two different pillow sides allow any sleeping position
- breathable high-tech memory foam with ventilation channels
- particularly delicate, cozy and breathable pillowcase
- also practical when traveling

Item No.

10271

**BLACKROLL® POSTURE TRAINER 2.0**

The **BLACKROLL® posture trainer** for back and shoulders is an easy-to-use and extremely effective tool for correcting posture – in everyday life, during sport or at work.

- less pain and more muscle strength by optimizing the straightening of the spine
- can be worn comfortably over and under clothing
- exercises, news and advantages of the article are available via a free app

Item No.

S/M/L
XL/XXL10270
10282

HIGHROLLER

The **HighRoller** is ideal for warming up, stretching and loosening the fascias before and after exercise. The roller concentrates the pressure on the muscle being massaged. The complete frame consists of a sturdy support frame, a crossbar, two hand screws and four aluminum feet.

- innovative fascia tool on a mounted frame
- improves blood circulation
- concentrates the pressure on the muscle to be massaged
- supports can be removed on one or both sides in order to be able to treat fascia in a targeted manner

More training equipment from HighRoller at www.k-active.com

Item No.

Fascia roller 46 x 14 cm Ø

10291

FLEXVIT MINI single

The mini band that feels really good on the skin. No rolling up, no pulling and at the same time robust and tear-resistant. Thanks to the innovative woven rubber, **FLEXVIT Mini** offers decisive advantages compared to conventional rubber bands:

- ideal for physiotherapy, rehab, fitness training in a team and individual sports
- exceptionally attractive feel
- soft and good for the skin, no pulling of the hair
- six different strengths for all requirements

Item No.

32 x 5.7 cm

50300

FLEXVIT MULTI single

Thanks to the innovative design with sewn-in loops, it offers infinite exercise possibilities – only limited by your own creativity. The **woven rubber** and the special design give the **FLEXVIT Multi** decisive advantages compared to other fitness bands:

- easy adjustment in terms of body size and/or exercise thanks to fixed loops
- resistance can be varied almost indefinitely (progression, regression)
- four different strengths for all requirements

Item No.

27.5 x 3 cm

50310

FLEXVIT

NOW WITH
WOVEN RUBBER

KONE-X ACTIVE MAT

Standing and moving on the mat activates the approx. 200,000 nerve endings on the underside of the foot. This can improve blood circulation, reflux, and muscle strength, and relieve foot pain. In addition, the reflex zones can have a stronger influence on the internal organs.

- ideal for sporting activity, at work, in prophylaxis and regeneration phases
- training of the foot muscles and arches
- increases the controllability of the muscles
- contributes to building muscle strength throughout the body, improves coordination and balance

Item No.

46 x 61 x 2.5 cm

10294

TRIGGERDINGER

With our **Triggerdinger** you can treat and release muscular tension and myofascial **trigger points** in a targeted and precise manner. The pressure exerted selectively by the **Triggerding** stimulates and promotes the blood circulation and thus the oxygen supply to the affected muscles.

- for releasing muscular tension
- robust, abrasion-resistant and durable product
- the right size for every application

Item No.

32 x 5.7 cm

10433

ALSO AVAILABLE
IN A SET

FREECEPS BOX

Freeceps is perfect for self-massage of **trigger points**, but especially of **trigger bands**. The flexible positioning enables treatments on the entire body - without to luxate! Ideal for relieving tension from head to toe easily and calmly. No rolling or sliding away.

- fixation on all smooth surfaces, e.g., door frames, cupboards, lacquer or glass surfaces, possible
- handle made of blasted aluminum (can be removed and used as a therapy tool)
- adapter with suction mechanism made of plastic and steel
- incl. handle, adapter, instruction book

Item No.

27.5 x 3 cm

10430

TOGU® ACTIBALL®

The **Actiball®** – made in Germany – is an air-filled regeneration tool for self-massage and is used in fascia fitness, training and therapy. The material Ruton is hardened, robust and easy to clean, skin-friendly, odorless and 100% recyclable.

- for fascia fitness, self-massage and treatment of trigger points
- loosens adhesions and tension and promotes blood circulation
- flattened knobs enable an effective and pleasant massage effect

■	Item No.
9 cm Ø	10300

TOGU® POWERBALL® PREMIUM ABS®

The air-filled ball with **ABS®** (Anti-Burst-System) strengthens the abdominal, back and core muscles in particular through safe, effective and dynamic back and stability training. The ball can avoid or alleviate back problems by sitting upright and moving around.

- guaranteed burst safe through anti-burst system
- specifically strengthens the back, buttocks and abdominal muscles
- improves coordination and balance e.g. when used in the office or as seating furniture in leisure time

55 cm Ø	10346
65 cm Ø	10351
75 cm Ø	10356

TOGU® BRASIL SET OF 2

With the handy **TOGU® Brasil® Set**, the deep muscles are stressed with small movement amplitudes. In targeted exercises in which the **Brasil®** is shaken, the special filling can be used to achieve a reflex tension of the entire trunk.

- handy deep muscle trainer for a versatile and effective workout
- ideal for preventive back training and in rehab

■	Item No.
Set of 2; 270 g	10366

TOGU® JUMPER® PRO

The **Jumper® Pro** is a semicircular exercise ball that is attached to a plastic plate. It is particularly suitable for coordinative exercises and jumps. If you use the Jumper Pro with the plastic plate facing up, you can do other joint-friendly exercises for strength, endurance and coordination.

- trains important deeper muscles - especially the back muscles
- improves balance, coordination and sensorimotor skills
- can be used standing, jumping, sitting or lying down

■	Item No.
50 cm Ø; approx. 2.5 kg	10336

TOGU® BALANZA® BALLSTEP®

There are four extremely robust air-filled balls under the specially developed plate. In contrast to conventional balance boards or steppers, this special construction makes the standing surface unstable and floating.

- enables and increases sensorimotor training: for more balance and stability
- intensive training of the deep muscles
- trains & improves perception, stimulus processing and stability

■ ■ ■ ■	Item No.
89 cm x 43 cm x 14 cm; 5.15 kg	10308

TOGU® ACTIROLL® WAVE

The **Actiroll® Wave** fascia roll – made in Germany – is an air-filled and at the same time hard roll that is used as a regeneration tool for self-massage and relaxation. It can be easily and continuously adjusted to different degrees of hardness with the included hand pump.

- the first individually adjustable fascia roller with a wave surface
- can loosen adhesions and tension
- promotes blood circulation in the treated area

■ ■ ■	Item No.
15 cm x 6,5 cm	10363
30 cm x 11.5 cm	10302

You can find more TOGU® products at www.k-active.com

FOR TRAINING AND THERAPY – JOY OF MOVEMENT IN BALANCE

MFT® CHALLENGE DISC 2.0

The **Challenge Disc 2.0** contains motion sensors with a Bluetooth module for wireless communication with an iOS, Android or Windows mobile device or notebook. It recognizes how well the movements can be balanced, how the balance can be kept and gives a recommendation as to which level the training should be started with. The patented movement mechanism enables athletes, seniors and children to have a coordinated training level.

- analyzes balance ability
- contains motion sensors (Bluetooth) for wireless communication with an iOS, Android or Windows mobile device or notebook
- strengthens the back, keeps the joints healthy and ensures more concentration and creativity
- areas of application: home training, personal training, fitness studio, clinic, rehabilitation center, physical practice, prevention, rehabilitation

Item No.

10207

MFT®
Bodyteamwork

MFT® FIT DISC

With the **Fit Disc**, the training stimuli are set over an unstable surface. The tilting of the plate provokes and trains compensatory movements of the body at the same time.

- targeted training for back, spine and joint problems
- including DVD

Item No.

10203

MFT® SPORT DISC

If the training goal is "increased performance", then the **Sport Disc** is exactly the right thing. Because at a high level it puts your own coordination skills to the test.

- sport-specific training in 3 dimensions, also ideal for top-class sport
- including DVD

Item No.

10205

MFT® TRIM DISC

With the help of the **Trim Disc**, one learns to stabilize the musculoskeletal system in a targeted manner and to gradually improve coordination. The **Trim Disc** is well suited for home training, group training, therapy and rehabilitation.

- the all-round device for stabilizing the musculoskeletal system and improving coordination
- for the fitness-conscious, those who enjoy exercise, athletes and patients
- including DVD

Item No.

THERABAND™

A large selection of exercise bands: different colors, thicknesses and lengths

- 100% natural latex or latex-free
- available in eight resistance levels
- ideal for therapy, popular and competitive sports
- almost unlimited possibilities for use in strength and coordination training

Different colors and strengths:

- thin - ideal in therapy
- medium strong - ideal in therapy
- strong - ideal for training beginners
- extra strong - ideal for advanced users
- especially strong - ideal for competitive athletes

The Thera-Bands are a great support in daily training and are important for preventing injuries.

Pierre Busch, player TV Großwallstadt

FUNCTIONAL TRAINING FOR A HEALTHY BODY

THERA-BAND® MADE OF NATURAL LATEX

Handy and versatile, the **Thera-Band®** exercise band is considered the smallest fitness studio in the world. The linear build-up of strength with increasing stretching of the exercise bands protects the joints and prevents injuries - a significant plus in therapy and fitness training.

- 100% natural latex
- available as single tapes or as a supply roll
- incl. 32-page exercise instructions "Fit with the exercise band"

12.8 cm x 2.5 m
12.8 cm x 5.5 m
12.8 cm x 45.5 m

Item No.

50212
50222

THERA-BAND® LATEX-FREE

The latex-free **Thera-Band®** was modeled on the unique resistance properties of the original latex exercise band. In addition, it is powder-free and odorless.

- latex-free (suitable for allergy sufferers)
- powder-free and odorless
- linear force-elongation behavior

12.8 cm x 2200 cm

Item No.

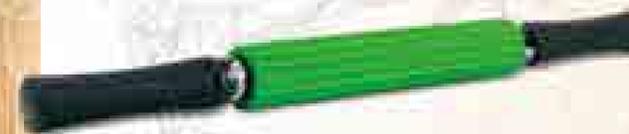

50232

THERA-BAND® ROLLER MASSAGER

Particularly suitable for self-massage of all large muscle groups. In addition, the foot muscles / plantar fascia can be massaged and stretched with the **Roller Massager**.

- made of natural rubber: non-slip, does not leave any marks
- grooved surface structure promotes the massage effect

Item No.

50240

THERA-BAND® ROLLER MASSAGER PORTABLE

Roller Massager Portable is particularly suitable for self-massage of all large muscle groups and is particularly space-saving with its retractable handles.

- also suitable for cooling applications (after cooling in the freezer)
- extendable handles

Item No.

50241

SUPERVISOR CASES AND BAGS

The right product for every medical challenge

In your function as a doctor, therapist or supervisor, adequate suitcases or bags are one of the basics in everyday life. Whether it is a stable and robust metal sports case – **Made in Germany** –, a trolley with plenty of storage space or handy supervisor bags for acute treatment directly on the field: all requirements are met here.

The Profi sports case is super clearly arranged so that everything we need for the game is immediately at hand. Traveling abroad without the sports case is out of the question.

*Sebastian Pommer,
Physiotherapist SV Darmstadt 98*

K-ACTIVE® SPORTS CASE PROFI

High quality manufactured case. The inside of the hinged lid is equipped with a pocket and rubber holders (e.g., for a sports tape protective cover, [see page 40](#)). The interior of the case can be divided individually with variable partitions. There are two removable holders for three bottles each on the narrow outer sides. Ideal for first aid in amateur and professional sports.

- reinforced aluminum frame and edge protection
- interchangeable compartments and removable holders for drinking bottles, lockable
- quality "Made in Germany"
- incl. carrying strap and six drinking bottles

Item No.

24 x 52 x 33 cm

21110

K-ACTIVE® SPORTS CASE LIGA

High-quality case with a variable lid pocket and practical, interchangeable slide-in brackets. Extremely resistant due to the reinforced aluminum frame; has a lockable lock.

- reinforced aluminum frame and edge protection
- interchangeable compartments and variable lid flaps, transparent compartment for plasters etc.
- quality "Made in Germany"
- incl. shoulder strap

Item No.

REHAB MEDIC® MEDICAL STAFF BAG

The padded sports bag is easy to carry and offers plenty of space for equipment such as tapes, scissors, tweezers, cooling sprays and creams. It is made of washable and waterproof polyester with a PVC coating. The heavy-duty zippers as well as reinforced handles and shoulder straps ensure a long service life.

- ideal for hobby and competitive sports
- easy to carry, lots of space for equipment; washable and waterproof
- reinforced handles and shoulder straps

Item No.

small, 45 x 26 x 28 cm

21120

large, 56 x 32 x 34 cm

21130

REHAB MEDIC® TROLLEY-SET PRO RM

The right trolley for big tasks in sports supervision and especially when traveling. Ideal for transporting many products for optimal therapy thanks to the smooth-running wheels and folding handles. Very clearly arranged due to the many pockets and compartments.

- outside pockets for quick access to important materials
- main pocket with four large horizontal dividers and 8 small vertical dividers that offer a total of 13 spaces for storing materials
- additional folding divider with three transparent pockets

Item No.
211302

REHAB MEDIC® BACKPACK

In contrast to the use of suitcases and bags, you always have your hands free. The wide and padded straps ensure a comfortable fit. The all-round upholstery protects the products from external influences.

- pouches and compartments on the sides for bottles, tubes, etc.
- two separate zip compartments on the outer front
- three zip compartments on the inside of the lid
- variable division of the interior through individually adjustable velcro separators

Item No.
21160

K-ACTIVE® DRINKING BOTTLE

For adequate hydration during exercise! Highest quality standard – Production in Europe.

- large opening, thus easy and hygienic cleaning
- fits in the bottle holder of the K-Active® Sports Case Profi (see page 63) or in bicycle holders

DIAGNOSIS & THERAPY

The dialogue with your body

DIAGNOSIS & THERAPY

Selected tools for your success

In order to take appropriate therapeutic measures, a prior correct diagnosis is essential. The **Multiscan**, the **physiokey®** and the **K-FORCE** products provide you with detailed information about your patient's state of health and thus offer a basis for your therapy, among other things. Your hands are your capital there. Sometimes, however, helpful tools are also required to achieve the desired therapy results.

We support you among other things with products for successful flossing, innovative cupping and modern cold compression as well as with popular and proven recovery boots and vibration massage devices.

The **physiokey®** is an integral part of my daily work in my practice and for the German national judo team.

Marco Welz, sports physiotherapist of the German national judo team

physiokey® STANDARD

Based on the principles of **bioadaptive-controlled impulse therapy**, this device carries out a diagnosis and intensively increases self-regulation in the body using 11 programs. The aim of this therapy is rapid pain relief, functional improvement and a positive change in the state of tension in the muscles.

- applications: diagnostics, bioregulation, keyphoresis
- incl. **physiokey®**, standard interchangeable head, charging cable with USB plug, charging station
- optional: interchangeable heads for different applications

	Item No.
185 x 51 x 28 mm	10700

physiokey® PROFISSET

The professional set combines the **physiokey®** with all available interchangeable heads in a special package. This means that you have the optimal tool at hand for every desired application.

- interchangeable heads, for example, for selective or area application or for the therapy of heavily hairy parts of the body or of animals
- incl. **physiokey®**, standard interchangeable head, charging cable with USB plug, charging station, 5 different interchangeable heads, case, educational material

	Item No.
	10708

sanakey® STANDARD

The **sanakey®** activates the body's own regulation through bioadaptive impulses. The emission of impulses influences the autonomic nervous system and thus the body's own adaptation processes. The immune system is strengthened and the body is shown a way to help itself.

- therapy device for medical and private users

Item No.
10800

dermakey®

The **dermakey®** supports the cleaning, care and activation of the skin and high-quality cosmetics.

- ideal for cosmetic applications
- areas of application: skincare, wellness and the treatment of tissue weaknesses and cellulite

Item No.
10900

K-FORCE APP PRO / PRO+

The free basic app for all K-FORCE products only includes a limited version for working and evaluating patient profiles. In order to really take advantage of all the possibilities of the devices, we recommend access to the **App PRO** or **App PRO+**.

- cloud for 3 or 20 devices
- assessment and management of patient profiles
- account adjustments: user profile, hospital information and personalized reports
- access to exercises, rehab games and customer ratings

Item No.

per year

11117

K-FORCE MUSCLE CONTROLLER

The muscle strength measuring device is ideal for a quick assessment of the muscle strength of your patient or athlete. It is an easy-to-use, portable muscle test bench. You can use it in your clinic, practice, or even in your patients' home.

- electronic pressure transducer
- provides acoustic and visual feedback in real time
- can absorb contact forces of up to 70 kg

Item No.

60 x 100 x 140 mm

11115

K-FORCE SENS

An innovative device for assessing the range of motion and comparing the symmetry between the amplitude of the injured and healthy part of the body.

- determination of the amplitude of the joints
- adjustable parameters enable rehabilitation programs

Item No.

35 x 25 x 10 mm

11112

K-FORCE PLATES

K-FORCE PLATES are used to rehabilitate balance and assess the symmetry and strength of the muscles of the lower extremities.

- Rehabilitation of balance and assessment of symmetry
- evaluation of the load on the lower extremities and balance of depth perception

Item No.

30 x 320 x 160 mm

11110

K-FORCE LINK

Use the **K-FORCE LINK** to measure isometric strength. Train your patients with real-time biofeedback. Take quality measurements.

- can be easily attached to the physiotherapy table, a trellis or a pulley system
- incl. 2 snap hooks, 2 buckles, 2 rubber bands of different strengths, 1 adjustable rigid band for measuring the maximum isometric force

Item No.

11113

K-FORCE GRIP

The **K-FORCE GRIP** is a dynamometer for measuring grip strength in various situations. You can assess the maximum isometric strength as well as the fatigue.

- small, light and mobile
- ergonomic elliptical shape
- can record a grip strength of up to 70 kg

Item No.

45 x 55 x 160 mm

11111

**BODYCHECK
IN PROGRESS**

MULTISCAN PRO

The **Multiscan Pro system** is an innovative measuring and analysis system that provides valuable and holistic information about the organs and the functional state of health of the body.

- detailed results after only 2 minutes of measurement time
- various important medical technologies are combined in one device
- comprehensive support for decisions on procedures and follow-up measures for performance enhancement, therapy and rehabilitation, e.g., biochemical overviews, cardiovascular and diabetes screening, autonomic nervous system in detail
- use also in amateur and elite sports: lifestyle, nutrition and nutritional supplementation, exercise and counseling in therapy

	Item No.
Mobile Device	20007
Kiosk, touch screen 27", 32" o. 43"	20004

You can find the different versions of Multiscan Pro at www.k-active.com

MULTISCAN FIT

The **Multiscan Fit** is a functional system for fitness diagnostics. The measurement results can be used as a recommendation for the type and intensity of training, nutritional advice Wellness and SPA applications and movement control.

- retrieval of results after only 60 seconds of measurement (self-measurement possible)
- various important technologies are combined in one device
- individual monitoring in prevention and aftercare: Autonomic nervous system assessment, body composition, cardiovascular assessment, microcirculation, spinal imaging, blood pressure assessment and risk factors, individual nutritional counseling and -supplementation, sports and exercise analysis.

Dimensions kiosk: 103 x 60 x 220 cm

How fit is your body?

MULTISCAN FIT

The innovative measuring and analysis system

HRV (heart rate variability)

PTG (Plethysmography SpO2)

BIA (Body Index Analysis)

ActivForce 2

The patient or athlete wants to see measurable results and improvements? Then you as a user or therapist simply use the **ActivForce 2**. Via the Bluetooth function of the device and the free **activ5** Companion App, the entire training is not only accompanied in a playful way, but the data and results are shown transparently to the user at any time.

- measurement of strength, active and passive ROM, muscle symmetry
- results can be sent as a PDF by mail
- incl. padding accessories for bony body parts, 3 straps for attachment to body parts.

	Item No.
9.5 cm x 7.8 cm x 3.3 cm	11105

NUBIS® PRO

Nubis®Pro is a massage table that consists of an inflatable mattress and a sturdy aluminum frame. By stowing it in a handy suitcase with wheels, the transport of the therapy table to patients or sports facilities is no longer a problem!

- very easy transport thanks to the practical and handy transport case supplied
- quick assembly and use thanks to the supplied electric air pump
- optional: printing your own logo on the therapy bed and / or bag

Item No.

190 x 75 x 60 - 85 cm

50607

NUBIS® RECOVERY CHAIR

The **Nubis® Recovery Chair** is an extremely lightweight, transportable and air-filled recliner. It features an innovative design that provides you with the best position for prolonged muscle recovery. In the folded position, it also takes up very little space, making it very easy to transport.

- extremely light: only 2.9 kg
- quick assembly and use
- incl. carrying bag, optional: electric pump, imprint of your own logo.

Item No.

175 x 98 x 87 cm

50707

PRACTICE EQUIPMENT

No optimal therapy without the right equipment

The equipment of your practice is so much more than just furniture and devices. A coherent design creates a feel-good atmosphere for the patient. Functionality also plays a major role, because with the right therapy bed and accessories such as knee rolls and stools, you are always optimally equipped for any type of treatment.

In our therapy worlds you will also find what you are looking for – no matter what your budget is.

NUBIS® Accessories

The **frame reinforcement** is used to stabilize the therapy table during manipulations or other treatments. It can be attached to both the foot end and the top end.

The **face pad** can be attached to all **Nubis®** therapy tables. The cushion convinces with its very soft and comfortable material.

The **inflatable roll** can be used universally for all treatments.

40-pack	51445
60-pack	51446

STENDO® PULSE THERAPY

The innovative **STENDO® pulse therapy** device mobilizes the tissue locally. The impulses are cardio-synchronized. This means that the "compression" is reduced with each heartbeat. This special feature increases the production of nitric oxide in the vessels, which is considered one of the biomechanical forces for vasodilation. This vasodilation and the rehabilitation of the endothelial tissue take place first locally and later in the entire vascular system, which then leads to an improved circulation in the body and an optimization of the vascular system. At the same time, lymph congestion and edema – with the often – associated tension pain and inflammation – as well as general tiredness in the extremities are improved. Studies prove the effectiveness of this treatment method.

Areas of application for **STENDO® pulse therapy**:

- prophylaxis for the vascular system
- endothelial disorders (diabetes, chronic inflammation)
- lymph congestion, edema
- regeneration after work and sport
- after injuries and operations
- beauty care

Item No.
20010

Arrange your consultation appointment now!

The STENDO® can be controlled using the appropriate app on the smartphone

Fountain of youth for the vascular system

K-ACTIVE® RECOVERY

Tired and swollen legs after work, a workout or a shopping trip? **K-Active® Recovery** combines all the advantages of high-quality recovery boots. Four air-filled chambers “massage” your legs from far to close to your body in order to remove liquids and waste products in the extremities, among other things. The volume of your legs is reduced and at the same time regeneration is accelerated and pain is reduced.

- volume reduction of the legs
- regeneration after intense physical activity / sport
- reduction of swelling before or after liposuction
- relaxation of muscle pain
- thromboembolism prophylaxis
- incl. compression device with power cord, two leg cuffs (length 110 cm, Ø 35 cm), manual
- optional: arm and hip cuffs

Item No.
10588

With the **K-Active® Recovery** we manage to optimally regenerate the tired legs of our ice hockey professionals and bring them back to the highest level of performance more quickly.

Robin Kohl, Team Manager Krefeld Pinguine

NORMATEC® 2.0

The market leader for fast regeneration, rehabilitation and apparatus lymph drainage. Successfully used in top-class and amateur sports, in hospitals and medical practices as well as by private individuals. The Recovery Systems are of modular design. With the two different control units **2.0** and **2.0 PRO** leg, hip and arm parts can be operated. The chambers are filled with air and thus lead to a compression of the tissue at the corresponding point.

- dynamic compression devices for optimal regeneration and rehabilitation with battery operation
- reduces swelling
- approval for apparatus-based lymphatic drainage by the FDA
- thanks to the battery operation, the device can also be used when traveling or when exercising outdoors
- leg cuffs available in three sizes

RECOVER LIKE A CHAMPION!

K-ACTIVE® CRYOPUSH

The importance of using cold and compression against pain and swelling after a physical overload, injury or surgery are well known: Cold removes energy from the affected area of the body in order to reduce inflammation. In addition, the cold temporarily constricts the blood vessels, reducing blood flow and weakening inflammatory processes.

The compression helps to reduce swelling and thus to increase mobility and ensure that the muscles can be controlled. In addition, the pain caused by the swelling is reduced.

- compression and cooling at the same time
- temperature and compression can be controlled individually
- suitable for **heat and cold therapy**
- matching cuffs for ankle, knee / thigh, torso / hip and shoulder
- incl. cooler, four cuffs, power supply unit, carrying bag, user manual

Item No.

52103

Through the symbiosis of cold and compression, **CRYOPUSH** has become an integral part of therapy in practice and on training camps.

*Christian Halbig, physiotherapist
Austrian national wrestling team*

COOL.PRESS.RECOVER.

HYPERVOLT BLUETOOTH®

The **Hypervolt vibration massage tool** from **Hyperice®** is perfect for self-massage and effectively promotes blood circulation! This can relieve muscle soreness, accelerate healing after muscle injuries and shorten recovery time!

- increases the local blood circulation of the tissue
- 5 attachments for different treatment focuses
- 3 speed levels with up to 3200 beats / min
- incl. vibration massage tool, 5 interchangeable head attachments, lithium-ion battery, charging cable with power supply unit

Item No.

20054

HYPERVOLT PLUS BLUETOOTH®

As the big brother of the Hypervolt vibration massage tool, the **Hypervolt Plus** has a whopping 50% more power! The motor is no longer 60 watts like the original device, but 90 watts. The device thus increases not only its performance, but also your regeneration!

- powerful 90 watt high torque motor
- Quiet Glide™ technology - very quiet
- elegant, matte black finish
- incl. vibration massage tool, 5 interchangeable head attachments, lithium-ion battery, charging cable with power adapter.

Item No.

20055

HYPERVOLT GO

Thanks to its compact size, you can take it anywhere and put it to effective use. Whether in the office, on the team bus or on vacation, the light and portable massage gun is the perfect companion for your everyday life!

DEEP OSCILLATION®

Electrotherapy at the highest level

With the patented method of deep oscillation, **PHYSIOMED®** has created a new milestone in electrotherapy. **DEEP OSCILLATION®** uses electrostatic attraction and friction to set the treated tissue into pleasant vibrations. This is said to accelerate performance, regeneration and self-healing.

DEEP OSCILLATION® also already has a convinced circle of users in the beauty sector.

Depending on the indication, pre-programmed treatments from the application areas of sports, medicine and beauty can be performed.

- performance and regeneration improvement
- post-traumatic
- post-op and scar optimization
- pain and arthrosis therapy
- lymphatic problems

DEEP OSCILLATION® PERSONAL

Perfect for daily use. Quick use of the right frequency by choosing proven, pre-programmed indications. Mobile device for a fast and quick use of one-channel deep oscillation on the patient. Incl. therapy card „Basic“ or „Pro“.

- **Basic:** Preprogrammed indications can be selected
- **Pro:** Preprogrammed indications can be selected + creation of your own program with three different frequencies / frequency bands possible.

Item No.

DEEP OSCILLATION® Personal - Basic	20100
DEEP OSCILLATION® Personal - Pro	20101

DEEP OSCILLATION® EVIDENT

The **Evident** clinical device with its wide range of setting options is perfectly suited for stationary use. Thanks to the intuitive one-button operation and the touchscreen, the indications are easy to find and individual settings can be made quickly.

- stationary device for use in the clinic, practice or cosmetic studio
- two-channel deep oscillation
- pre-installed indications from the fields of esthetics, orthosport or clinics

Item No.

DEEP OSCILLATION® Evident Aesthetics	20102
DEEP OSCILLATION® Evident Orthosports	20104
DEEP OSCILLATION® Evident Clinics	20103

- individual setting of frequency and frequency bands, pulse duty factor, therapy duration and burst function
- allows treatment to be tailored to the patient's needs

I can use **DEEP OSCILLATION®** in almost all areas of sports physical therapy. My favorite feature: In addition to the applicator, I can even transfer the deep oscillation very effectively with my therapeutic hands to the athlete!

Marco Kress, Physiotherapist Türkgücü München

IONOSON-EXPERT (3rd edition)

Professional electrotherapy, ultrasound and simultaneous therapy for clinics, rehabilitation centers and physiotherapy practices. The **IONOSON-Expert (3rd edition)** effectively combines stimulation current therapy and ultrasound therapy in only one device.

Stimulation current therapy:

By applying medium-frequency, low-frequency or galvanic currents, the following effects are achieved, among others:

- pain attenuation
- improvement of blood circulation and trophicity
- stimulation of nerves and muscles

Ultrasound therapy:

Depending on the therapy parameters, ultrasound treatment focuses on a thermal effect or micromassage in the treated tissue segment.

- hyperremization
- pain relief
- accelerated healing processes
- muscular detonation and spasm release
- acceleration of metabolic functions

Product details:

- easy to use touch screen and single button operation
- comprehensive overview of currently used therapy parameters and timers
- extensive list of indications

Item No.

MASTERPULS® ONE

The **MASTERPULS® ONE** is ideally suited as a compact and flexible entry-level device for radial shock waves, with which all standard indications can be treated. Kinetic energy is introduced into the patient's treatment zone with a compressed air-driven projectile via an elastically suspended applicator. The shock waves spread over a large area in the tissue.

- ideal entry-level or supplementary model
- best "shock wave companion" outside of the practice
- perfect for use with trigger points, myofascial pain syndrome, tendon attachment diseases or the calcified shoulder
- light and low-vibration
- easy to use and versatile in use
- incl. basic device, SPARROW handpiece, applicator, 3 handpiece tubes, gel, tool, cleaning brush

STORZ MEDICAL

Item No.

Basic device 29 x 23 x 31 cm

BellaBambi®
by K-Active®

BellaBambi® TRIO

The innovative negative pressure massage enables a variety of applications in the areas of sport, wellness and beauty. The different intensities ensure that every user can work comfortably and effectively.

- to support massage, fascia training, scar and cellulite treatment, peeling and skin care
- set consists of one BellaBambi® SENSITIVE, BellaBambi® REGULAR and BellaBambi® INTENSE
- ideal for practices or family members with different requirements

	Item No.
20 mm Ø	12692
34 mm Ø	12693

BellaBambi® REGULAR

The BellaBambi® "Regular" is suitable for different applications, for example to support regeneration in case of sore muscles or for partner massage. The medium intensity level promises success with many skin and connective tissue types, including beauty applications on the abdomen and thighs.

- effectively promotes blood circulation through negative pressure
- perfect for regeneration with sore muscles or for partner massage
- suitable for beauty applications, e.g., with cellulite on the stomach and thighs

	Item No.
20 mm Ø	12682
34 mm Ø	12672

BellaBambi® MULTI SET

Professional system for three-dimensional massage with negative pressure generated by an electric pump. The precisely adjustable device provides even more precision and control over a wide variety of fascia applications.

- automatically generated negative pressure
- selective to flat and reproducible application
- incl. vacuum pump, connection hose, original (Ø 34 mm) and mini (Ø 20 mm) application, disinfectant, carrying bag, operating instructions with instructions for use

	Item No.
	12710

BellaBambi® INTENSE

The BellaBambi® "Intense" is suitable for vigorous use on the back, arms or legs. It has the greatest effect on the skin and is therefore a welcome opportunity to increase the strength of the "Regular" stimulus.

- for particularly powerful shear effects
- effective increased blood flow, e.g., on the back, arms and legs
- perfectly suitable for people with robust skin and well-trained muscles

	Item No.
20 mm Ø	12689
34 mm Ø	12679

BellaBambi® MULTI APPLICATION

Together with the double connection hose, you can work with both hands at the same time by using 2 applications. It is particularly suitable for treating larger areas.

	Item No.
20 mm Ø	12712
34 mm Ø	12711

BellaBambi® connecting hoses

Extends the range of applications of BellaBambi® multi by using another application.

- Material: silicone

Connecting hose	12714
Double connection hose	12713

6D TAPE

Six-Dimensional Method®

lymphatic-venous transition area

Activation of lymph nodes

6D TAPE

Stick on and activate!

The surface of the **6D Tape** is equipped with the patented so-called "activation pads". By pulling, turning and pressing in six different directions you can move the underlying structures and thereby exert mechanical stimuli on them and on the nervous system. The exchange of fluids between cells is activated and the individual cells can better absorb and release necessary substances. In addition, the arterial inflow and the outflow of the venous and lymphatic systems can be supported.

Scar activation

Fascia activation and pain reduction

6D TAPE

It can be used individually or in a therapy chain and is particularly suitable for self-therapy.

Areas of Application:

- for prophylaxis and performance enhancement
- general lymph and pain problems
- after injuries, operations and during pregnancy
- increasing the effect of compression therapy / - devices
- in the beauty sector

	Item No.
1 m strip	17600
3 m strip	17601
5 m strip	17602
Knee set	17603
Elbow set	17604
Breast Post Operation Set	17605

BIOSWING® POSTUROMED® 202

The therapy surface of the neuro-orthopedic diagnosis, prevention and therapy device is attached to special oscillating elements that allow dosed, dampened evasive movements in a certain frequency range and with differently adjustable oscillation amplitudes.

By increasing the proprioceptive, vestibular and optical afferents on the **Posturomed®**, an optimal quality of postural actions and reactions can be worked out. This individually dosed activation of segmental, sectoral and polysemantic coordination serves to optimally stabilize the load-bearing joints and the spine.

- to improve coordination and stability
- approved as a class 1 medical product
- can be supplemented with numerous additional modules

	Item No.
Therapy surface 60 x 60 cm	55400

K-ACTIVE® FLOSSBAND XL

Made from 100% natural rubber and particularly suitable for "compression therapy". They are available in different widths and strengths in order to be able to optimally treat different body areas and body sizes.

- moves liquids in the area of the application
- positive influence on receptors and structures
- improves the joint mechanics
- reduces swelling and relieves pain

	Item No.
240 x 0.15 x 5 cm	50151
240 x 0.15 x 7.5 cm	50152
240 x 1.02 x 5 cm	50153
240 x 1.02 x 7.5 cm	50154

With the floss bands I have had very good experiences in prophylaxis and after injuries and operations of my patients!

Torge-Nils Eistrup, graduate physiotherapist and osteopath; K-Active® instructor

K-ACTIVE® GREEN

Our new product line: the healing powers of mother earth

“ We like to purchase the food supplements from K-Active® in order to ensure good regeneration and performance for our players.

Jörn Klümper, Physiotherapist Offenbacher Kickers

FOOD SUPPLEMENT

Extra power on demand

Dietary supplements have long since found their way into our everyday lives, because the demands on our lives have increased, but at the same time the quality of our food is sometimes declining, which means that our body can no longer be adequately supplied with essential substances.

The positive effects of a comprehensive supply of nutrients on the body and mind cannot be denied; they help us to get faster, higher and further.

Regardless of whether you want to strengthen your immune system or increase your cognitive abilities: at K-Active® Green you will also find the support you need.

SQUEEZY® ATHLETIC

Weight tuning for athletes and figure-conscious people – made from multiple fermented grains. The powder contains valuable proteins, fibers and carbohydrates with a very low glycemic index (<20). The ingredients also include vitamins, minerals and trace elements. Without synthetic colorings.

- facilitates weight loss, weight control or weight optimization
- very low glyx-index reduces the risk of food cravings
- easy and quick preparation

Vanilla, banana	Item No.

The concentrated power of Ayurveda

VelaCell stands for one thing above all: Ayurvedic herbs in top quality. The German agricultural engineer and managing director of VelaCell Harald Seibel always ensures the optimal conditions for cultivation in the Indian state of Punjab himself. In addition, the areas on which the effective herbs are grown are certified organic by the German LACON Institute.

MORINGA – The concentrated power of Ayurveda for your body

The moringa tree is one of the most nutritious plants on earth. Optimal conditions in the cultivation area ensure extremely rapid growth of the plant and thus enable the development of the highest nutrient concentrations.

- physical activator, containing vitamins and minerals
- supports the immune system and regeneration, helps detoxify and build body structures
- from certified organic cultivation

Item No.

Jar of 120 capsules	18814
Jar of 240 capsules	18815
Jar 100 g powder	18816

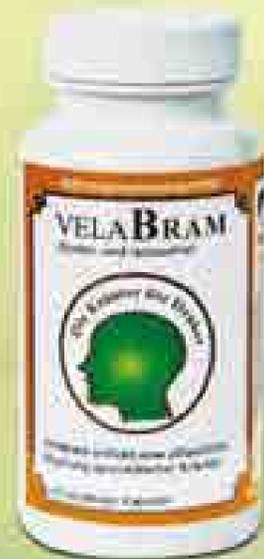

BRAHMI – The thinkers' herbs

Brahmi is a mixture for optimizing the brain nutrition and normalizing the cognitive abilities according to an old Ayurvedic recipe. It can harmonize the mind and create a more alert feeling. It is therefore particularly suitable for school stress and exams, for sport and work as well as for high mental stress.

- mental activator, increases your creativity
- promotes concentration and cognitive skills
- increases memory performance and memory
- can prevent dementia

Item No.

Jar of 60 capsules	18813
--------------------	-------

ASHWAGANDHA – The secret of inner peace and serenity

The root of the plant contains the highest concentration of valuable substances. VelaCell Ashwagandha consists of pure root powder so that all the ingredients it contains interact optimally with each other and can develop their full potential.

- promotes stress reduction and healthy sleep
- relieves depression, anxiety and permanent fatigue
- increases performance and muscle formation
- strengthens the immune system

Item No.

Jar of 240 capsules	18818
---------------------	-------

Leaves of the moringa oleifera tree

VITA CHIP®

for holistic health

The increasing demands of our time, as well as radiation exposure from electronic devices or cell towers, create many new sources of stress. The effects can be various: Nervousness and inner restlessness, sleep disorders, chronic pain and much more. Radiation is also said to promote the development of diseases through cell stress.

The vita chip® contains magnetite and a composition of the purest minerals. The special feature, however, is the programming of energy and information, which balances negative fields and brings the body „into vibration“. Attached to your smartphone, laptop, etc., the electronic device amplifies the recorded frequencies of the **vita chip®**.

Effects according to experience and tests:

- reduction of EMF stress ("electro smog")
- increased concentration and focus
- improved recovery & regeneration
- more restful sleep

Find your suitable vita chip® now!

VITA CHIP® E

The **vita chip® "E"** is your ideal start to test the effectiveness of the systems. Simply equip one of your electronic devices e.g. your smartphone, tablet, TV, phone or any other with the **vita chip®** to harmonize electromagnetic radiation and turn your device into a bio resonance transmitter.

- harmonizing harmful frequencies
- emitting positive information frequencies
- emitting of positive frequencies from 13 minerals
- **vita chip 2.0:** larger volume and more minerals for even better harmonization

* The effect of the technology presented here has not yet been scientifically proven. At present, these are exclusively personal and subjective opinions of individual users or medical personnel. Conclusive studies are being prepared.

	Item No.
vita chip® "E"	18860
vita chip® 2.0	18867

VITA SYSTEM 8 HOME

Harmonize your home and transform your four walls into an oasis of wellbeing with the **vita system 8 "home"**. The cell stress is reduced and the self-healing powers are activated. The magnetic field of the electronic devices intensifies the effect and transforms them into bio transmitters.

- harmonizing your home for more vitality
- security for the whole family
- reduction of voltage and interference fields
- works on a physical, psychological and etheric level
- supports the optimization of geomantic fields

	Item No.
8 vita chips®	18861

VITA SYSTEM HEALTH

Normal cell communication is a basic requirement for good health. The vibration information stored on the **vita system health** interacts with your biological systems and supports them effectively.

- use for prophylactic health maintenance and support of performance

Attaching the **vita chip®** by means of **K-Active®** tape to:

- pain, trigger and acupuncture points
- reflex zones, scars and fibroses
- spine and intervertebral discs

	Item No.
Set of 4	18863
Set of 8	18865

VITA SYSTEM 8 OFFICE

Create a healthier and better working atmosphere by installing our **vita systems** in your office. Enrich your team with relaxation, less stress and more concentrated, better work.

	Item No.
8 vita chips®	18862

VITA SYSTEM 8 CAR

Our cars are fully packed with control electronics. Airbag, navigation, Bluetooth and sensory parking aid are also part of the modern equipment. The **vita system 8 "car"** ensures a healthy balance.

	Item No.
8 vita chips®	18866

KNOWLEDGE

Holistic solutions
for sport and medicine

You can find all books and DVDs here: www.k-active.com

KNOWLEDGE

The key to convincing competence

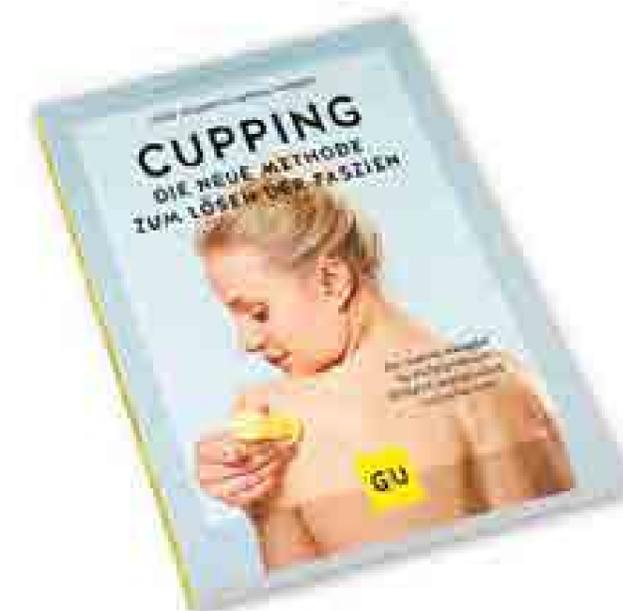

What use are countless tools and various forms of therapy if you don't know how to use them competently? It's never too late for further training! Acquire your knowledge yourself by selected reading material of different subject areas or attend one of our high-quality courses in kinesiology taping or another specialty.

CUPPING – The new method for loosening the fascia

Today, in addition to athletes, many therapists also use the method of cupping for relaxation and pain relief. The easy-care silicone cups can be simply squeezed together by hand and placed on the skin. They are unbreakable and easy to clean. The negative pressure created relieves tension, stimulates blood flow, stimulates lymph flow and “massages away” pain.

The book conveys the practical application clearly and step by step.

German	Item No.
128 pages, approx. 100 illustrations, softcover	6385DE

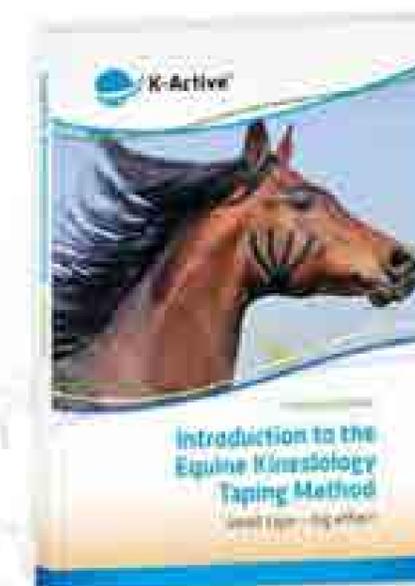

Introduction into kinesiological taping on horses

The guide is aimed primarily at veterinarians and therapists as well as interested horse owners who have a basic knowledge of horse anatomy and pathology.

The history of the development and the theoretical basic knowledge of kinesiological taping as well as the practical implementation of the techniques, especially on horses, are conveyed. Numerous photos and case studies give the reader practical instructions.

- with numerous photos and case studies

German, English	Item No.
114 pages, softcover	6352DE
106 pages, softcover	6352EN

The pubic bone inflammation

The pubic bone inflammation usually manifests itself as acute or chronic pain in the area of the pubic bones and the pubic symphysis. **Marco Congia**, (sports) physiotherapist and alternative practitioner, has gathered many experts around him to take stock of this symptom from different perspectives. The book is recommended for medical staff and trainers, but also for those affected.

- therapy guide for this specific clinical picture
- numerous case studies from practice

German	Item No.
156 pages, hardcover	6370DE

The K-Active® training system

High-quality courses, extensive knowledge and thousands of satisfied graduates - these are the characteristics of the proven K-Active® training system for over 13 years. Continuous progress and the constant integration of the latest scientific findings are among our main tasks.

Our dedicated team of instructors strives to prepare you for successful kinesiological taping in everyday life. Your patients, your members and your athletes benefit from this.

Our vision: health and quick healing for all people.

MASTERCLASS MODULE 1

This course opens the doors for you to professional kinesiology taping. The history and philosophy of the popular therapy method form the basis of the training. A key element of the course is the holistic approach: Optimal therapeutic results are only possible through a holistic view of the body. After the course you will be able to apply kinesiological taping independently and successfully.

You can expect this know-how:

- different techniques of kinesiological taping
- holistic assessment, partly in groups
- standardized & proven tape applications with a focus on the myofascial system
- practical exercises with competent assistance from the instructor

MASTERCLASS MODULE 2

Kinesiology taping is a comprehensive and in-depth therapy method. In **module 2**, know-how about fascia research, segment anatomy, the reflex relationship between muscle and organ and the organic clock is integrated.

You can also expect:

- effective special techniques
- expansion of the holistic assessment to internal organs, nerves, lymphatic and vascular systems and appropriate standardized tape applications
- in-depth study of the topics of the lymphatic system, cancer follow-up care, nerve pain, vegetative dystonia and much more.

SPECIAL COURSES

Convince with competence in your specialty! The possibilities of kinesiological taping are as diverse as injuries and clinical pictures can be. In sports medicine, for example, the requirements differ fundamentally from those in pediatrics, gynecology, lymphology or neurology.

- Sports
- Gynecology & Obstetrics
- Lymphology & Scars
- Pediatrics
- Spine & SIJ
- Neurology
- Dance sport

TAPING FOR HORSES

As an ambitious veterinarian or therapist, one thing is particularly important to you: the impeccable health and excellent fitness of your animal patients. If therapeutic intervention is necessary, long-term therapeutic success is extremely important for both horse and owner.

Now ensure lasting results by having your "healing hands" in the form of a kinesiological tape work even after the horse is back in the stable at home.

- theoretical basics of kinesiological taping
- different techniques of kinesiological taping
- special features of the tape application on the horse
- practical exercises on selected clinical pictures in humans and horses

INHOUSE TRAINING

Save time, money and at the same time bring your whole team to a uniform level of knowledge! At your request, we can also hold any course in your practice, clinic or school.

- attractive special prices
- less time required
- no expenses for travel or accomodation
- learning in a familiar environment
- team building
- individual topic requests can be taken into account
